

## DESCRIPTION

Calcium plays a vital role in the anatomy, physiology, and biochemistry of organisms and of the cell, particularly in signal transduction pathways. It is vital in cell signaling, muscular contractions, bone health, and signaling cascades. Hormones like Parathyroid, calcitonin, and vitamin D3, tightly regulate Ca and Phomeostasis.

## INDICATIONS

Rickets, Tibial dyschondroplasia, osteoporosis, cage layer fatigue, soft shelled eggs, thin-shelled eggs, and broken eggs.

In addition as a general supportive in parasitic infestation and other calcium deficiency conditions.

Note: pH and few fatty acids may cause calcium soaps.
